

IMPORTANT TOPICS *for* **NORCET**

1. Midwifery & Obstetrical Nursing
2. Adult Health Nursing Surgery
3. Adult Health Nursing Medicine
4. Nursing Foundations
5. Community Health Nursing
6. ENT
7. Pediatrics
8. Pharmacology
9. Mental Health Nursing
10. Microbiology
11. Applied Biochemistry & Nutrition
12. Anatomy & Physiology

HIGH YIELD TOPICS NORCET

MIDWIFERY & OBSTETRICAL NURSING

1. Obstetric score
2. Calculation of EDD
3. Antenatal care
4. Anemia in pregnancy
5. Anemia Mukht Bharat Program
6. Abortion
7. MTP
8. Ectopic pregnancy management
9. Snowstorm appearance of molar pregnancy and management of hydatidiform mole
10. Chorionic villi sampling
11. Amniocentesis
12. Cord prolapse
13. Shoulder dystocia management
14. PPH management and risk factors
15. Active management of third stage labor
16. Partogram and labor care guide
17. Antepartum hemorrhage-placenta previa and abruptio
18. Placenta accrete type
19. Breech maneuver
20. Leopold maneuver
21. Fetal skull diameters
22. Instruments for the curettage and cesarean section
23. Episiotomy
24. Diabetes in pregnancy
25. PIH
26. Dose of anti-D and indication
27. Twins- Types, superfecundation, and superfetation

GYNECOLOGY

1. Vaginitis
2. PID
3. Syndromic Mgt of PID and vaginitis
4. Emergency contraceptives
5. Cut
6. OCP-MALAD, MALA N, absolute contraindications
7. Pap smear
8. Vasectomy and tubectomy
9. HPV and vaccine
10. Ovarian tumors and markers
11. Semen analysis

ADULT HEALTH NURSING (SURGERY)

1. Surgical safety check list
2. Patient position
3. OT position
4. Cautery images
5. Sutures and knot
6. Surgical site: Infection and its prevention
7. Type of wound
8. Nutrition: NG Tube feeding and TPN, CVP line care
9. Shock
10. Basics of trauma
11. GCS
12. Abdominal trauma
13. Thoracic trauma: Pneumothorax and hemothorax
14. Head injury: EDH and SDH
15. Burn
16. Plastic surgery principles: Skin graft and humby's knife
17. Bedsores
18. Wound healing
19. Liver abscess and cancer
20. Gallbladder stones
21. Pancreatitis and whipple surgery
22. Renal stone and renal cancer
23. Horse shoe kidney
24. Bladder cancer
25. Urethral trauma
26. Hypospadias
27. Ectopia vesicae
28. Undescended testis
29. Torsion
30. Hernia
31. DVT
32. Osteomyelitis
33. Rickets
34. Osteomalacia
35. Fracture and its healing
36. Local anesthesia
37. Instrument
38. Basic of ventilator
39. Achalasia cardia
40. Central diverticulum
41. GERD
42. Esophageal perforation

43. Barrett esophagus
44. IHPS (Infantile hypertrophic pyloric stenosis)
45. Peptic ulcer
46. Portal hypertension
47. Bariatric surgery
48. Meckel diverticulum
49. Appendicitis
50. Hemorrhoids
51. Fissure
52. Colorectal cancer
53. Massive blood transfusion
54. Triage

NURSING FOUNDATION

1. Infection control
2. Code of ethics
3. Lines and tube: Suctioning, ETT, NG tube, tracheostomy care, and CVP line
4. Oxygen therapy
5. Blood transfusion and blood sampling
6. IV fluids
7. Oral care (unconscious patient)
8. Airway management
9. IV Cannula
10. CPR
11. Drug calculation
12. Bandaging
13. Patient positioning
14. Assessment scale
15. Enema
16. Care of colostomy patient
17. Medication: Drug calculation and administration of medication
18. Patient safety
19. Crutch walking
20. Restraint
21. Health assessment
22. Urinary catheter care
23. Chest tube care
24. Thoracentesis
25. Lumbar puncture
26. Pulmonary artery catheter
27. Pressure ulcer
28. Vital sign
29. Spill management
30. Needle stick injury

COMMUNITY HEALTH NURSING

1. Vaccines
2. Cold chain
3. Family planning methods
4. Diarrhea and its management
5. Child growth and ICDS
6. Nutritional guidelines for pregnant and lactating females
7. Mosquito, ticks, mites, louse-identifying factors, and prevention
8. NTEP, NACP, and NLEP
9. Malaria, and vector borne diseases
10. Rickettsial disease
11. Epidemiology and study design
12. Indradhanush scheme
13. National rural health mission
14. Janani suraksha yojana
15. Disease determinants
16. Pathogenicity
17. Incubation period
18. Ascariasis
19. Chicken pox
20. Measles
21. Airborne/droplet/contact and precaution
22. Bordetella pertussis
23. Small pox
24. Hepatitis C and E
25. Brucellosis
26. Anthrax
27. Trachoma
28. Malaria
29. Types of prevention
30. Iceberg phenomenon of disease
31. Maslow's hierarchy of needs
32. Socio-economic indicator
33. Anthropology
34. Hardness of water
35. Theme of world health day
36. Chlorination
37. Air pollution
38. No tobacco day
39. Occupational hazards
40. Anganwadi worker
41. ASHA
42. CHC population
43. Primary health center (PHC)/population

44. Rashtriya swasthya bima yojana (RSBY)
45. MCH program

ADULT HEALTH NURSING (MEDICINE)

1. Fluid and electrolyte imbalance with ECG changes
2. Vagal maneuver
3. Basic ECG
4. Heart failure sound (rhonchi, wheezes, pleural rubs and crackles)
5. Pulse pressure
6. Myocardial infarction/enzyme marker
7. Rheumatic fever
8. Varicose vein
9. Ventricular fibrillation
10. Coronary artery bypass grafting
11. Angina (types-variant)
12. Bacterial endocarditis
13. Constrictive pericarditis
14. Aortic balloon pump
15. Cardiac tamponade
16. Pacemaker
17. Cardioversion
18. Defibrillator
19. Cardiac monitor
20. PCWP
21. Pulmonary artery catheter
22. Thyroid eye disease
23. DKA (Kussmaul breathing)
24. Diabetes insipidus
25. DM
26. Simmonds' disease
27. Hypoparathyroidism and hyperparathyroidism
28. Graves's diseases
29. Iron deficiency anemia
30. Thalassemia
31. Leukemia
32. Sickle cell
33. Lymphoma
34. Hodgkin's lymphoma
35. Lordosis, scoliosis, musculosclerosis, and kyphosis
36. Paget's disease
37. Colle's fractures
38. Sprain
39. Amputation
40. Trochanter rolls
41. Arthroplasty (arthrodesis, arthrotomy)
42. Gout
43. ABG
44. Nephrotic syndrome
45. Chronic renal failure
46. Hemodialysis
47. Nephrectomy
48. Acute kidney failure
49. Hydronephrosis
50. Pyelonephritis
51. Colostomy
52. Acute pancreatitis
53. Biliary colic
54. Inflammatory bowel disease
55. Ileostomy
56. Esophageal varices
57. Perforated duodenal ulcer
58. Cirrhosis of liver
59. GERD
60. Esophageal varices
61. Melena
62. Urea breath test
63. Increased ICP
64. Spinal cord injury
65. Nerve palsy
66. Parkinson's disease
67. Kernicterus
68. Stroke
69. Myasthenia gravis
70. Epilepsy
71. Guillain-Barre syndrome
72. Multiple sclerosis
73. Alzheimer's dementia
74. Meningitis
75. Brain edema
76. Tonic-clonic seizure
77. Pontine hemorrhage
78. Normal respiratory rate
79. Respiratory distress
80. Mantoux skin test
81. Tuberculin test
82. Pulmonary edema
83. Obstructive sleep apnea
84. Positive end expiratory pressure (PEEP)- Indication and contraindication
85. Lung cancer

86. Pulmonary embolism
87. Occupational lung disease (bronchiectasis, bagassosis, Monday fever/byssinosis)
88. Apnea
89. Pulmonary function test
90. Cheyne-Stokes respiration
91. Cessation of breathing (brain death)
92. Pneumonia
93. Scrotum
94. Exstrophy of bladder
95. Urolithiasis
96. Types of urinary incontinence
97. Fecal incontinence
98. HIV
99. Kaposi sarcoma
100. Wasting syndrome
101. UTI
102. HAI
103. Wheal, vesicle, papule, and macule
104. Contact dermatitis
105. Scabies
106. SJS
107. Barium enema
108. X-ray basic

EAR, NOSE, THROAT

1. Presbycusis
2. Otoscope
3. Laryngoscope
4. Acute epiglottitis
5. Meniere's disease
6. Epistaxis
7. Tinnitus
8. Profound hearing loss
9. Weber's test

CHILD HEALTH NURSING

1. Weech's formula (birth weight and birth height)
2. Gomez classification
3. Fetal weight (Johnson's formula, Shepard's formula and Hadlock's formula)
4. Teeth eruption
5. Closes of fontanel
6. Integrated child development services

7. Height measurement
8. Milestones
9. Trisomy 21
10. Cystic fibrosis
11. Patau syndrome
12. Malnutrition
13. Indicator of malnutrition
14. Calorie intake of 1-year old
15. Evaluation of nutritional status
16. Kwashiorkor
17. Vitamin A doses
18. Rickets
19. Neonatal period
20. KMC
21. Breast feeding
22. Regurgitation
23. Thermoregulation
24. Regulation of temperature in neonates
25. Dehydration (signs of severe dehydration)
26. Hypoxia
27. Cleft lip
28. Thermoregulation (hyperthermia, and normal room set up)
29. Meconium aspiration syndrome
30. Respiratory distress syndrome
31. Neonatal resuscitation
32. Bag-valve-mask ventilation
33. Neonatal Moro reflexes
 - Creeping
 - Parachute
34. Hemorrhagic disease
35. Cardio-pulmonary function (good skin color)
36. Pulse rate of a child (chronologically)
37. Cyanotic heart disease
38. PDA
39. Cyanosis
40. TOF
41. Mitral stenosis
42. Coarctation of aorta
43. Site of hematopoiesis
44. Hemophilia
45. Leukemia
46. Sequestration crisis
47. Thalassemia
48. Aplastic anemia
49. Causes of neutropenia

50. Meningitis
51. Spina bifida occulta
52. Babinski sign
53. Hydrocephalus
54. Types of seizures, seizure management and clinical features
55. Post-natal period findings
56. Neural tube defect/marker
57. Cerebral palsy
58. Brain tumor
59. Craniosynostosis
60. Pyloric stenosis
61. Hirschsprung's disease
62. Tracheoesophageal fistula
63. Normal respiratory rate
64. Primary apnea
65. Croup syndrome
66. Asthma
67. Pulmonary atelectasis (lobe involvement)
68. Bronchopulmonary dysplasia
69. SLE
70. Skin variations in children
71. Cradle cap
72. Glomerulonephritis
73. Nephrotic syndrome
74. Ophthalmic neonatorum
75. ADHD
76. Kramer's index

PHARMACOLOGY

1. Toxicity
 - ➔ Cocaine
 - ➔ Acetaminophen
 - ➔ Carbon monoxide
 - ➔ Digoxin toxicity
 - ➔ Magnesium
 - ➔ Organophosphorous poisoning
 - ➔ Combat magnesium sulfate toxicity
2. Antidotes
3. Blood
 - ➔ Antiplatelet drugs
 - ➔ Thrombolytic therapy side effect
4. Cardiovascular drugs
 - ➔ Emergency treatment of hypotension
 - ➔ Vasoconstriction and vasodilation

- ➔ Digoxin
- 5. General pharmacology
 - ➔ Route of drug administration
- 6. ANS
 - ➔ Adrenaline doses ratio
 - ➔ Mydriasis and miotics
 - ➔ Anticholinergic
 - ➔ Atropine
 - ➔ Anaphylaxis
- 7. GIT
 - ➔ Antidiarrheal
 - ➔ PPI
 - ➔ Carminatives
 - ➔ Anti-emetics
- 8. Antimicrobial drugs
 - ➔ 1st line treatment for pulmonary TB
 - ➔ Side effects of TB drugs
 - ➔ Tetracycline
 - ➔ Anti-malarial
 - ➔ Cephalosporin
- 9. Pain management and anesthetics
 - ➔ Fentanyl
 - ➔ Pentothal sodium
 - ➔ Gaseous anesthetic
 - ➔ General anesthesia
 - ➔ Anesthesia position (spinal)
 - ➔ Complications of spinal anesthesia
 - ➔ Regional anesthesia
- 10. Renal
 - ➔ Diuretics
 - ➔ Lasix
- 11. Insulin
- 12. Anticancer
- 13. Dose calculation/Flow rate/Drugs per minute in adults and children
- 14. Drug of choice
- 15. Alcohol withdrawal symptoms
- 16. Malignant hypertension

MENTAL HEALTH NURSING

1. Psychosocial theory- Erikson
2. Ego defense mechanism
3. Psychoanalytical theory
4. Sigmund Freud's structural theory of mind
5. Delirium

6. Delirium vs. dementia
7. Parkinson's disease
8. Extra pyramidal symptoms
9. Vascular dementia
10. Bender gestalt test
11. Side effects of antipsychotic medications
12. Side effects of Tri-cyclic antidepressant (TCA) drugs
13. Side effects of Chlorpromazine (Thorazine)
14. Blood test when the patient is on regular Clozapine
15. MAOIs
16. Depression
 - Neurotransmitter deficit
 - Types of delusion
 - Depression vs. normal grief
 - Omega sign
 - Clinical features
17. Lithium/Serum lithium test
18. Bipolar disorder
19. Manic-depressive disorder
20. Types of Hallucinations
 - Negative sign
 - Positive sign
21. Bleuler's 4 As
22. CAGE questionnaire
23. Cannabis sativa
24. Chronic alcoholism
25. Alcohol withdrawal symptoms
26. Medical complication of alcoholism- Korsakoff's psychosis
27. Delirium tremens
28. Opioid
29. Codeine
30. Conversion disorder
31. Phobia
32. Somatoform disorder
33. Obsessive-compulsive disorder
34. Eating disorders
35. Childhood disorders (autism)
36. Distinguishing feature of psychotic disorders
37. REM and NREM
38. Types of procedures
 - Electroconvulsive therapy
 - Cognitive therapy

MICROBIOLOGY

1. Method of sterilization
2. Viral family
3. Hepatitis (most common A)
4. Epstein-Barr virus
5. Mumps
6. HIV
7. HPV
8. Rota virus
9. Methods used to observe motility
10. Acid-fast stain
11. Tyndallization
12. Rod-shaped
13. Gram-positive organisms
14. Heterotrophs
15. Endotoxin vs. exotoxin
16. Bacterial growth curve
17. Neisseria gonorrhoeae
18. Salmonella typhi
19. Borrelia
20. Treponema pallidum
21. Vibrio cholerae
22. Food poisoning
23. Streptococcus
24. Clostridium perfringens
25. Clostridium tetani
26. Escherichia coli
27. Mycoplasma
28. Entamoeba histolytica
29. Types of tests (Schick test, Lepromin test, Frei's test, Dick test, Widal test)
30. Aspergillus
31. Definition (immunity)
32. Active immunity
33. Passive immunity
34. Herd immunity
35. Innate immunity
36. Artificial immunity
37. Hypersensitivity reaction
38. Immunoglobulin
39. Cell mediated immunity

BIOCHEMISTRY

Nutrition	Vitamin deficiency (hot topic)/excess
	Minerals
	Food (disease)
	Anion and cation
	Caloric intake
Urinary chemistry	Low urine specific gravity
	Ketone bodies
Fat	Omega-3 PUFA
	Ketone body
	Transportation of triglycerides from liver to adipose tissues
Cell biology and cell cycle	Prokaryotic cell and eukaryotic cell
	Sequence of mitosis
	Power house of cell
	Protein synthesis
	Cytoskeleton
	Cytoplasm
Carbohydrate	TCA cycle
	Lactose
Nucleic acid	DNA
	Chromosome
	Mutation
Protein	Keratin
	Structural protein
Amino acid	Essential

ANATOMY AND PHYSIOLOGY

Basic physiology	Types of solution
	Fluid
	Diffusion
	Plasma
	Osmosis
Lower limb	Basic anatomy (osteology)
	Longest vein
	Plantar flexion
Upper limb	Nerve supply
	Muscles (origin, insertion)
Muscle	Mouth muscle
	Anterior thoracic wall
	Movement (abduction, adduction, eversion)
	Boxer's muscle

Thorax and abdomen	Retroperitoneal structure	
Endocrine system	Adrenal gland	
	Growth hormone	
	Pituitary gland (anterior and posterior)	
	Thyroid	
Reproductive system	Hormones	
	Embryo (testis → scrotum)	
	Semen analysis	
Gastro and hepato biliary system	Hormone secretions	Motilin
		Intrinsic factor of castle
		HCL
	Absorption of minerals	
	Enzymes	
	Large intestine	
	Islets of Langerhans	
Central Nervous System	Basic anatomy	
	Cervical vertebrae	
	CSF	
	Parasympathetic nervous	
	Nerve physiology	
	Brain (physiological function)	
	Broca's area	
	Sympathetic nervous system	
	Root value of reflexes (knee jerk)	
	Plexus (brachial, cervical)	
	Thermoregulatory center	
	Cervical nerve	
	Cranial nerve	
Respiratory system	Planter reflex	
	Openings in the diaphragm	
	Arterial supply	
	Diaphragm (physiology)	
	Visceral pleura	
	Cricoid cartilages	
	Lung volume and lung capacity	
	Larynx	
Basic osteology	Lining of lung epithelium	
	Respiratory center (most stimulant)	
	Joint	
	Types of bone and number of bones	
	Covering of bone	
	Bone forming cells (osteocytes, osteoclasts, and osteoblasts)	
	Largest Bone	

CVS &Blood	Anatomy of heart
	Clotting factor
	Mineral require for clotting
	Normal blood parameter
	Blood
	Hemopoiesis
	Heart sound
	Cardiac output
	Blood pressure
	Pacemaker
	Stroke volume
	Oxygenated blood/Deoxygenated blood
	Arterioles and veins (diameter, resistance)

Special sense	Eye
	Agnosia
	Ear
	Anosmia
	Brain auditory pathways
Renal	GFR
	Absorption in renal tube
Nerve injury	Carpal tunnel syndrome
	Foot drop
	Winging of scapula
